OBJECTIVES

Seeking a challenging position as a Java Developer where I can apply my skills in Java and Spring Framework to develop efficient, scalable, and high-quality software solutions that contribute to organizational growth and success.

SKILLS

TECHNOLOGIES

CORE JAVA

JAVA 8

HTML

CSS

JSP

Ms Sql

FRAMEWORKS

- Spring Boot
- Spring Data JPA
- MS SQL
- Rest Api
- Git/Github
- React (Basic)

SOFT SKILLS

- Dedicated and Proactive
- Team Player
- Problem Solving Skills
- Good Listener

OTHERS

- Agile
- MVC
- Version control (GIT/GitHub)
- Eclipse
- PostMan Api

WORK EXPERIENCE

- As a Software Developer with around 3 years of experience in developing full-stack web applications.
- Experienced in building robust backend services and RESTful APIs using Java and Spring Boot.
- Skilled in developing frontend interfaces using JSP and React to deliver enhanced user experiences.
- Strong in database , including efficient schema creation and query optimization for data handling.
- Adept at troubleshooting, debugging, and optimizing software components for improved performance and scalability.
- Passionate about delivering high-quality, maintainable solutions and contributing effectively within a collaborative, growth-oriented environment.

Designation : Software Developer**Location : Coimbatore****PROJECT DETAILS****CHCP – (Healthcare Management System)****May 2024- Present****Description :**

A comprehensive healthcare management system designed to automate and streamline the end-to-end medical claims process. The platform enables healthcare providers and administrators to efficiently manage user and patient records, claims processing, billing, rate management, and report generation, ensuring accuracy, and compliance with healthcare standards.

Role: Full Stack Developer**Responsibilities :**

- Developed and maintained application modules using JSP, JavaScript, and Spring Core for both frontend and backend functionality.
- Resolved bugs and implemented enhancements based on feedback from manual and automation testing teams.
- Integrated and optimized MS SQL Server database queries to improve data handling and performance.
- Ensured code quality and compliance using SonarQube and maintained version control through CVS.
- Collaborated in daily stand-ups and sprint meetings for task tracking and agile development.
- Utilized Eclipse for debugging, Postman for API testing, and currently learning React for future migration to a Spring Boot + React stack.

Tech Stack: JSP, JavaScript, Spring, MS SQL Server, CVS, Eclipse, Postman, SonarQube**CHERP System -- HealthCare Management Application****Apr 2024- Present****Description:**

A healthcare management application designed to streamline patient information, medical record management, and report generation. The platform helps healthcare providers efficiently manage clinical data, enhance patient care, and ensure compliance with healthcare regulations.

Role: Backend Developer**Responsibilities:**

- Supported and maintained the live application by identifying and resolving backend bugs to ensure smooth system performance.
- Implemented minor feature enhancements and UI modifications based on client feedback and business needs.
- Developed and integrated new modules to support additional vendor and patient record management requirements.
- Collaborated with cross-functional teams (frontend, QA, and support) to troubleshoot issues and deliver timely solutions.
- Ensured data accuracy, consistency, and compliance with healthcare standards in backend processes.

Tech Stack : Java 8,Jsp,REST Api, Spring ,Spring Data JPA, MS SQL**Tools Used :** Eclipse, SSMS , CVS (Version Control) .

Designation : Programmer Analyst**Location : Chennai****PROJECT DETAILS****Ecommerce-Based Application****Apr 2023 - Jan 2024****Description :**

The Ecommerce Client Side Application is a user-friendly interface tailored for sales representatives and distributors. Offering secure authentication, it provides access to real-time dashboards for order and customer management. It ensures flexibility and ultimately enhancing agent efficiency within the Ecommerce ecosystem.

Role : Backend Developer

- Working with Clients business requirement.
- Develop Coding and Debugging software components using Java and related technologies.
- Developing the code according to business requirements of the client.
- Send the developed code for testing
- Reporting to the onsite team on sprint meetings

Tech Stack : Java 8,Jsp,REST Api, Spring boot, Spring Data JPA, MySQL.**Tools Used :** Eclipse, MySQL Workbench, Postman Api, Git, Github
